Invited Talks:	PMI Washington DC Chapter	<i>"Applying Agile Principles Beyond Software Development"</i>

Project Management Experience

Stand Up Detroit LLC – Detroit, MI **Technical Director** *August 2009 - Present*

Founder and technical leader of consultancy which provides project management mastery, technology agnostic problem analysis, and solution recommendation and implementation for non-profit, educational, and governmental organizations.

- *Bing for Mayor* – Recommended a local and regional social media campaign to drive candidate recognition and campaign issue stance awareness among constituents and political influencers. Executed project plan alongside traditional field director groundwork.

Amazon – Seattle, WA **Technical Program Manager** *January 2015 – December 2015*

Project manager, technical architect, and platform owner of Amazon Prime Strategic Partnerships program. Responsible for coordinating with global software and business teams to provide Agile project management expertise for up to seven simultaneous projects. Participated in regular Scrum and Scrum of Scrums meetings with multiple matrixed software teams and reported to senior leadership.

- *Sprint Mobile/Frontier Mobile* – Successfully launched two mobile promotions leveraging the Prime Strategic Partnerships platform in collaboration with Amazon corporate partners.
- *Gift of Prime UK* – Designed, architected, and drove implementation of Prime gifting functionality in compliance with new 2015 UK VAT regulations. Worked closely with global software development teams to reach consensus on technical solution.
- *Prime Subscription Bundling* – Collaborated with tax, accounting, and mobile device teams to create the ability to offer discounted items alongside Prime subscription purchase.

Markon Solutions – Falls Church, VA **Project Manager** *May 2014 – December 2014*

Agile project manager and Scrum master specializing in Intelligence Community network infrastructure.

- *United States Intelligence Community* – Provided team leadership and Agile project management proficiency for application development team. Reviewed and drove consensus on project requirements and documentation, scheduled and led iterative Agile/Scrum development cycles, and worked directly with senior leadership on long-term business strategy.

Deloitte Consulting – Arlington, VA **Project Manager** *July 2012 – April 2014*

Project manager focused on federal enterprise infrastructure and software development projects.

- *Defense Security Cooperation Agency* - Led custom financial management software development project through all phases including requirements gathering, user acceptance testing, release, training, and documentation. Spearheaded effort to ensure federal compliance with DIACAP MAC III Sensitive, FedRAMP, and CMMI level 2 processes and security controls. Accountable for monitoring and controlling of project financials and regular reporting to senior leadership.
- *United States Intelligence Community* – Provided technical leadership and project management support for configuration management team responsible for enterprise-wide ITSM analysis and implementation of ITILv3 standards.

Oracle Corporation – Reston, VA **Program Manager** *July 2011 – July 2012*

Part of National Security Group leadership team tasked with identification, influence, and capture of major program opportunities for Oracle solutions in the federal market. Assisted with top-level strategy to build and expand project portfolio, including staffing and risk management planning. Held authority on profit & loss (P&L) tracking, control, and reporting to senior leadership.

- *Federal Bureau of Investigation* – Managed geographically dispersed technical staff on multiple data warehouse and identity management projects. Responsible for project scheduling and leading customer project management review (PMR).
- *United States Intelligence Community* – Worked closely in advisory role with client staff and project teaming partners to deliver thorough technical analysis of customer infrastructure capability and future state recommendation.

Booz Allen Hamilton – Vienna, VA **Project Manager/Technical Lead** *March 2009 – June 2011*

Consultant for Federal Practice engaged on multiple Intelligence and Defense projects.

- *National Aeronautics and Space Administration (NASA)* –Directed team of application development and systems administration staff supporting custom data warehouse application development project for aerospace engineering design laboratory.
- *National Institutes of Health (NIH)* - Made key contributions to major proposal win resulting in \$30M in annual revenue. Supervised application infrastructure engineering team which managed nearly 300 servers and 100TB of EMC storage. Spearheaded datacenter FISMA certification and accreditation (C&A) effort in accordance with NIST 500-292 reference architecture standards.

Campbell-Ewald – Warren, MI **Project Manager/Technical Lead** *October 2004 – December 2008*

Managed team of six direct reports responsible for client application infrastructure as well as vendor staff tasked with first-tier datacenter support. Led and expanded business unit transforming it from a cost center subgroup into a fully independent revenue generator.

- *United States Navy Recruiting Command (NRC)* - Planned and executed eighteen month project to migrate and upgrade Navy National Lead Tracking System (NALTS) used by hundreds of Navy Recruiters nationwide. Implemented use of cloud computing, server virtualization, and high availability configuration to cut hardware expenses by over 65% while maintaining average application uptime of 99.97%, with no unplanned outage lasting longer than 30 minutes.
